

ANSHUL NAGAR

Full-Stack Engineer | AI-Driven Development | React · Vue · Angular · Node.js · TypeScript · AWS

📞 +91 7415815549 ✉ anshulnagar112233@gmail.com 🔗 LinkedIn 🌐 GitHub 📍 Pune, India

Professional Summary

Full-Stack Engineer with **4+ years** of experience building scalable, production-grade web applications across the complete stack: React.js, Vue.js, and Angular on the frontend; Node.js and Express.js on the backend; PostgreSQL and MongoDB for data persistence; and AWS for cloud deployment. Combines strong full-stack fundamentals with hands-on AI-driven development, actively using GitHub Copilot, Cursor, Claude Code, Devin, Agentic AI workflows, and MCP Servers to ship higher-quality features faster. Experienced in integrating LLMs and GenAI tools (LangChain.js, Ollama, RAG pipelines) into production applications. Proven impact: **98% load time reduction** (17s to 250ms), **60% performance improvement** on enterprise SPAs, and **78%+ unit test coverage**. Known for clean architecture, reusable component systems, and mentoring developers.

Technical Skills

Frontend	React.js, Vue.js 3, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, SCSS, Redux Toolkit, RTK Query, React Hooks, React Router, Vite, Webpack
Backend & APIs	Node.js, Express.js, REST APIs, JWT Authentication, RBAC, WebSockets, GraphQL (Basic), Java (Basic)
Databases	PostgreSQL, MongoDB, MySQL, Mongoose ODM, Query Optimization, Redis (Basic)
Cloud & DevOps	AWS (EC2, S3, Lambda), Docker, Kubernetes, CI/CD, GitHub Actions, Git, Linux, Nginx, Agile/Scrum
AI Dev Tools	GitHub Copilot, Cursor, Claude Code, Devin (Cognition), Replit AI, Antigravity, Agentic AI, MCP Servers, Windsurf, Codeium, OpenAI Codex, Gemini CLI
AI / GenAI Eng.	LangChain.js, Ollama, LLMs, RAG, Vector Embeddings, Prompt Engineering, OpenAI API, Anthropic API, LlamaIndex, LLM Evaluation, AI Agent Design
Testing & Perf.	Jest, Vitest, MSW, Karma, Unit Testing, Integration Testing, Code Splitting, Lazy Loading, Memoization, Core Web Vitals, Lighthouse

Professional Experience

Associate Consultant, Full-Stack Engineer / Infosys Ltd
Pune, India

Nov 2024 – Present

- Architected and delivered full-stack features end-to-end: Vue.js 3 / React.js SPAs connected to Node.js/Express.js REST APIs, with PostgreSQL and MongoDB as data stores, deployed on AWS.
- Migrated legacy UI platforms to modern SPAs using Vue.js 3 (Composition API) and React.js, improving performance by **60%** and enabling SSR-ready, cross-browser compatible architecture.
- Designed scalable REST APIs in Node.js/Express.js with JWT authentication, RBAC middleware, request validation, and integrations with third-party enterprise services.
- Optimized PostgreSQL schemas and MongoDB collections via indexing, aggregation pipelines, and query tuning to improve API response times and reduce database load.
- Built reusable component libraries with TypeScript, React Hook Form, Zod validation, and RTK Query for server-state management, adopted across multiple project teams.
- Improved Core Web Vitals (LCP, CLS, FID) and Lighthouse scores via code splitting, lazy loading, memoization, list virtualization, and bundle optimization.
- Used AI-driven tools (GitHub Copilot, Claude Code, Cursor, Devin, Agentic AI, MCP Servers) daily to accelerate delivery and validate AI-generated code for correctness and security.
- Led code reviews and sprint planning; mentored junior developers on full-stack architecture, TypeScript best practices, and AI-assisted development workflows.

Associate Software Engineer / Rakuten Symphony
Indore, India

Jan 2022 – Oct 2024

Cloud Native Platform (React.js) · ObjectStore (Vue.js 3) · Bare Metal Manager (Angular)

- Achieved **98% performance improvement**: reduced SPA load time from 17 seconds to under 250ms via code splitting, lazy loading, Lighthouse-guided optimizations, and MongoDB/PostgreSQL query tuning.
- Built full-stack features using React.js (Redux Toolkit, RTK Query, React Router) connected to Node.js/Express.js APIs backed by PostgreSQL and MongoDB, for a cloud-native Kubernetes platform on AWS.
- Developed ObjectStore (S3-compatible) UI in Vue.js 3 with Composition API: User & Group Management, Site Replication, Bucket Listing, Settings, integrated with AWS S3-compatible REST APIs.
- Set up frontend quality toolchain: ESLint, Prettier, Husky, MSW (Mock Service Worker), Vitest, achieving **78%+ unit and integration test coverage**.
- Built Angular UI for Bare Metal Manager: FPGA/Ansible lifecycle workflows, bulk JSON/CSV import-export (1000+ records), and API-driven virtual console terminal for Kubernetes cluster access.

- Developed Express.js middleware API for dynamic runtime environment variable management, enabling zero-downtime configuration updates in AWS-hosted environments.
- Migrated legacy PHP server-rendered apps to React.js SPAs with zero downtime, coordinating API contract updates with PostgreSQL-backed Node.js backend teams.
- Implemented RBAC-based UI access control with role-specific routing, protected routes, and permission-aligned API calls, reducing unauthorized access to zero.

AI & GenAI Projects

Internal Knowledge Assistant (RAG Pipeline) / *React · Node.js · LangChain.js · Ollama · MongoDB*

- Built a full-stack RAG app: React.js frontend + Node.js/Express.js API, storing vector embeddings in MongoDB for semantic document retrieval using local LLMs via Ollama.
- Designed LangChain.js pipeline: document chunking, embedding generation, vector similarity search, and LLM response synthesis.
- Evaluated output quality, identified hallucinations and retrieval failures, and refined prompts and chunking strategies to improve accuracy.

AI-Powered Code Review Assistant / *Node.js · LangChain.js · OpenAI API · Prompt Engineering*

- Built a Node.js tool using LangChain.js and OpenAI API that analyzes React/TypeScript components and returns structured feedback on structure, performance, and edge-case coverage.
- Applied chain-of-thought prompting and few-shot examples to generate senior-developer-quality, actionable review feedback consistently.
- Identified AI-generated code with logic errors and missing validations, establishing a human-in-the-loop review standard for AI-assisted workflows.

Certifications

- AI Fluency: Framework & Foundations / *Anthropic*
- Build LLM Apps with LangChain.js / *DeepLearning.AI*
- JavaScript RAG Web Apps with LlamaIndex / *DeepLearning.AI*

Education

B.Tech, Information Technology / *Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore*

2018 – 2022
